

Overall Morningstar Rating™

Class A Shares

Rated against 206 funds in the Muni National Short Category, based on risk-adjusted returns.

# AB INTERMEDIATE DIVERSIFIED MUNICIPAL PORTFOLIO

Class A: AIDAX

## OBJECTIVE

- + Provide safety of principal and maximize total return after taking account of federal taxation

## PRIMARY INVESTMENTS

- + Municipal bonds that generate income exempt from federal taxes (some may be subject to the alternative minimum tax)

## FUND OVERVIEW

- + Conservative, high-quality portfolio—80% of its muni bonds are rated A or higher
- + Seeks to manage volatility and interest-rate risk by focusing on short- to intermediate-term bonds
- + Leverages the strength of AB's award-winning, fixed-income platform

## ANNUAL PERFORMANCE FOR CLASS A WITHOUT SALES CHARGE

The performance shown above represents past performance and does not guarantee future results. Current performance may be lower or higher than the performance information shown. You may obtain performance information current to the most recent month-end by visiting [www.abfunds.com](http://www.abfunds.com). The investment return and principal value of an investment in the Portfolio will fluctuate, so that your shares, when redeemed, may be worth more or less than their original cost. Returns for other share classes will vary due to different charges and expenses. Performance assumes reinvestment of distributions and does not account for taxes. If applicable, high double-digit returns are highly unusual and cannot be sustained; such returns are primarily achieved during favorable market conditions.

Prior to October 1, 2009 the maximum front-end sales charge for Class A shares of the Fund was 4.25%. If the Class A annualized returns for the Fund reflected the deduction of the former maximum front-end sales charge, its returns would be lower.

<sup>†</sup> The Fund's Class A share inception date is 2/1/02 and is the date used to calculate since inception annualized performance.

<sup>‡</sup> If applicable, this reflects the Adviser's contractual waiver of a portion of its advisory fee and/or reimbursement of a portion of the Fund's operating expenses. Absent reimbursements or waivers, performance would have been lower.

\* Yields for other share classes will vary due to different expenses. Unsubsidized SEC yield is calculated using the total expense ratio excluding any fee waivers.

<sup>^</sup> The taxable-equivalent yield is based on SEC yields and the stated marginal federal income tax rate and the maximum state taxes, where applicable.

**Past performance does not guarantee future results.** Morningstar ratings are specific metrics of performance and do not represent absolute performance of any fund. For each fund with at least a three-year history, Morningstar calculates a Morningstar Rating based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund's monthly performance, placing more emphasis on downward variations and rewarding consistent performance. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. The top 10% of funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars and the bottom 10% receive 1 star. The Overall Morningstar Rating for a fund is derived from a weighted average of the performance figures associated with its three-, five- and ten-year (if applicable) Morningstar Rating metrics. The Fund was rated 3, 4 and 4 stars against 206, 181 and 134 funds in the category for the three-, five- and ten- year periods, respectively. The Fund's other share classes may have different performance characteristics.

Effective Duration <sup>1</sup>	3.62 Yrs.
Average Effective Maturity <sup>2</sup>	4.92 Yrs.
Total Number of Holdings	982

- <sup>1</sup> Effective Duration is a measure of the sensitivity of an asset or portfolio's price to interest rate movements.
- <sup>2</sup> Average Effective Maturity is a measure of maturity which takes into account the possibility of bonds being called prior to maturity.
- <sup>3</sup> Holdings are expressed as a percentage of total investments and may vary over time.
- <sup>4</sup> A measure of the quality and safety of a bond or portfolio, based on the issuer's financial condition, and not based on the financial condition of the fund itself. AAA is highest (best) and D is lowest (worst). Ratings are subject to change. Investment-grade securities are those rated BBB and above. If applicable, the Pre-Refunded category includes bonds which are secured by US Government Securities and therefore are deemed high-quality investment-grade by the Adviser. If applicable, the Not Rated category includes bonds that are not rated by a Nationally Recognized Statistical Rating Organization.

Bloomberg 5-Year GO (General Obligation) Municipal Bond Index represents the performance of long-term, investment-grade tax-exempt bonds with maturities ranging from four to six years. Investors cannot invest directly in indices or averages, and their performance does not reflect fees and expenses or represent the performance of any AB fund.

**A WORD ABOUT RISK**

**Market Risk:** The market values of the portfolio's holdings rise and fall from day to day, so investments may lose value. **Municipal Market Risk:** Debt securities issued by state or local governments may be subject to special political, legal, economic and market factors that can have a significant effect on the portfolio's yield or value. **Interest Rate Risk:** As interest rates rise, bond prices fall and vice versa—long-term securities tend to rise and fall more than short-term securities. **Credit Risk:** A bond's credit rating reflects the issuer's ability to make timely payments of interest or principal—the lower the rating, the higher the risk of default. If the issuer's financial strength deteriorates, the issuer's rating may be lowered and the bond's value may decline. **Inflation Risk:** Prices for goods and services tend to rise over time, which may erode the purchasing power of investments. **Derivatives Risk:** Investing in derivative instruments such as options, futures, forwards or swaps can be riskier than traditional investments, and may be more volatile, especially in a down market. **Liquidity Risk:** The difficulty of purchasing or selling a security at an advantageous time or price. **Diversification Risk:** Portfolios that hold a smaller number of securities may be more volatile than more diversified portfolios, since gains or losses from each security will have a greater impact on the portfolio's overall value. **Local Economy Risk:** This portfolio may contain municipal securities issued by the Commonwealth of Puerto Rico as well as other local governments whose current economic conditions could exacerbate the risks associated with investing in these securities.
