

Regatta Platinum Variable Annuity

Sub-Account Performance Summary as of April 30, 2024

The Performance data below represents past performance which does not guarantee future results. Current performance may be lower or higher than the performance quoted. The investment return and principal value of an investment will fluctuate so that units, when redeemed, will be worth more or less than their original cost.

Performance results are for Delaware Life Regatta Platinum Variable Annuity, first available on 6/1/1998, which is no longer available for new investors as of 4/30/2003. Assumptions: \$1,000 allocated 100% to an investment option.

Non-standardized performance includes the historical performance of each Investment Fund Option since the "Fund Inception Date", that is, the date the fund commenced investment operations. Because some of the performance shown may predate the separate account, non-standardized performance is hypothetical and is provided for your convenience. The performance shown reflects all variable account annual expenses (including 12b-1 fees) of each Investment Fund Option, the 1.25% Mortality and Expense Risks Charge, the 0.15% Administrative Expense Charge and the 0.00% Distribution Fee but does not reflect the contract charge of \$35, the deduction of withdrawal charges, or the cost of any additional benefit options. Selection of an optional benefit would reduce the performance shown.

Regatta Platinum Variable Annuity

Sub-Account Performance Summary as of April 30, 2024

The Performance data below represents past performance which does not guarantee future results. Current performance may be lower or higher than the performance quoted. The investment return and principal value of an investment will fluctuate so that units, when redeemed, will be worth more or less than their original cost.

Performance results are for Delaware Life Regatta Platinum Variable Annuity, first available on 6/1/1998, which is no longer available for new investors as of 4/30/2003. Assumptions: \$1,000 allocated 100% to an investment option.

Adjusted non-standardized performance includes the historical performance of each Investment Fund Option since the fund's "Inception Date," that is, the date the fund commenced investment operations. Because at least some of the performance shown may predate the separate account, adjusted non-standardized performance is hypothetical and is provided for your convenience. Adjusted non-standardized performance is reduced by the maximum 6% withdrawal charge, which declines over 7 years according to the following schedule: 6%,6%,5%,5%,4%,4%,3%,0%. The performance shown reflects all variable account annual charges (including 12b-1 fees) of each Investment Fund Option, the 1.25% Mortality and Expense Risks Charge, the 0.15% Administrative Expense Charge, the 0.00% Distribution Fee and the contract charge of \$35, but does not reflect the cost of any additional benefit options. Selection of an optional benefit would reduce the performance shown.

Standardized performance includes historical returns that reflect the performance of each Investment Fund Option since the "Variable Account Inception Date", that is, the date the fund was first offered as an investment option in the variable separate account containing the Regatta Platinum Variable Annuity. For funds with a performance history of less than one year, performance results are not annualized. Standardized performance is reduced by the maximum 6% withdrawal charge, which declines over 7 years according to the following schedule: 6%,6%,5%,5%,4%,4%,3%,0%. The performance shown reflects all variable account annual expenses (including 12b-1 fees) of each Investment Fund Option, the 1.25% Mortality and Expense Risks Charge, the 0.15% Administrative Expense Charge, the 0.00% Distribution Fee and the annual contract charge of \$35, but does not reflect the cost of any additional benefit options. Selection of an optional benefit would reduce the performance shown.
